PROFILE SKILLS EDUCATION

## a little something about me

Hi, I'm a full stack developer who's been coding and designing for a bit over 10 years. I've had the chance to touch pretty much most technologies over the years, but try to stay proficient only in the most current or trending ones. Although I spend most my time coding full stack (front end / back end), I am actually quite comfortable with design and designer softwares like photoshop as it's always been important for me to be able to bring a project from it's imaginary phase all the way to a full web app.

Throughout the years, I've also had the chance to work with high traffic websites earning above 100 000 visitors a day – so having clean, developer friendly and high performance code is something I've been focused on delivering regardless of the size of the projects.

Aside from that, right now I'm starting to work a little more with angular.js. Can't say I'm proficient yet, but will be soon enough. I'm also planning on expanding towards android application development sometime this year, so that should be fun as well. :)

## SKILLS

### Languages

HTML5

CSS

Sass (prefered), Less, Plain CSS, Bootstrap, Responsive
